ABOUT US

CONODENT

Primal Sharpness. Modern Craftsmanship.

The First Surgical Instrument Processing Unit in the Sultanate of Oman.

Welcome to CONODENT. Established in **2025** in the strategic **Industrial Area of Ibri**, we are a pioneering Omani startup dedicated to the processing of premium Dental, Medical, and Veterinary Stainless Steel Instruments. As the first facility of its kind in the Sultanate, we are setting a new benchmark for industrial healthcare excellence in the region.

The Story Behind the Name: An Evolution of Precision

The name **CONODENT** is not just a brand; it is a tribute to the history of sharpness. It is derived from the **Conodont**—the earliest known vertebrate fossil found on Earth. These ancient, eel-like creatures were the first to evolve mineralized skeletons featuring incredibly sharp, tooth-like structures.

Just as the Conodont represented nature's first evolution of sharp, precise biting mechanisms, **CONODENT** represents the evolution of surgical manufacturing in Oman. We channel that primal history of durability into every instrument we forge, ensuring that our products are not just tools, but extensions of the human hand.

Our Expertise

We specialize in **Class 1 / Class A, Non-Measuring, Non-Sterile** instruments. We utilize only the most premium medical-grade stainless steel, combined with advanced designing capabilities to ensure perfect ergonomics and balance.

While we serve the broad medical and veterinary sectors, **Dental Instruments are our prime segment.**

- **Dental:** From diagnostic mirrors to high-precision restorative and extraction tools, we support dentists with instruments that offer superior tactile sensitivity.
- **Medical & Veterinary:** Robust, corrosion-resistant tools designed for general surgery and animal healthcare.

Quality & Vision

Safety is our currency. CONODENT is proud to be certified with **ISO 13485:2016 Quality Management Systems (QMS)**.

Our Vision: To provide premium quality instruments with absolute precision, honoring the rich culture of Omani craftsmanship while delivering global standards to the world.

Our Mission: To bridge the gap between traditional artistry and modern medical technology, providing healthcare professionals with instruments they can trust for every procedure.

QUALITY POLICY STATEMENT

CONODENT: The Evolution of Precision

CONODENT is firmly committed to pioneering the processing of premium Stainless Steel Surgical Instruments (Dental, Medical, and Veterinary) in the Sultanate of Oman. As the first of its kind, our success is built upon an unwavering dedication to quality, regulatory compliance, and customer satisfaction.

To achieve this, CONODENT commits to:

- **Establishing and Maintaining a Quality Management System (QMS)** that fully meets the requirements of the **ISO 13485:2016 Standard** for Medical Devices.
 - **Ensuring instruments are processed to the highest standards** of safety, reliability, and precision, using only premium medical-grade steel and advanced design protocols.
 - **Complying with all applicable national and international regulatory requirements** for the manufacturing and distribution of Class 1 / Class A Non-Measuring, Non-Sterile Surgical Instruments.
 - **Striving for Continuous Improvement** in our processes, product quality, and the effectiveness of our QMS.
 - **Meeting the needs and expectations of our customers** (including healthcare professionals and patients) by providing tools that enhance procedural success and provide excellent value.
- This policy is understood, implemented, and maintained at all levels of our organization in Ibri, reflecting our core belief that **Quality is not an act, but a habit.**

INSTRUMENT CARE & MAINTENANCE GUIDE

Preserving Precision, Ensuring Safety

To maximize the lifespan of your **CONODENT** premium instruments and ensure the safety of your patients, follow this standardized reprocessing protocol. Proper care prevents corrosion, maintains sharpness, and ensures smooth mechanical function.

1. Point-of-Use Preparation

- **Immediate Rinse:** Rinse instruments under warm running water immediately after use to remove blood, tissue, and debris.
- **Avoid Drying:** Never allow biological contaminants to dry on the instrument. If immediate cleaning isn't possible, use a pH-neutral enzymatic foam or gel to keep debris moist.
- **Separation:** Keep delicate items (Periotomes, Composite instruments) separate from heavy tools (Forceps, Elevators) to prevent tip damage.

2. Cleaning & Disinfection

- **Ultrasonic Cleaning:** This is the most efficient method. Use a pH-neutral detergent and ensure instruments are in the **open position**.
 - **Note:** Do not mix dissimilar metals (e.g., chrome-plated and stainless steel) in the same cycle to avoid galvanic corrosion.
- **Manual Cleaning:** Use only soft nylon brushes. **Never use steel wool or wire brushes**, as these will damage the protective "passive layer" of the steel and lead to "pitting."
- **Drying:** This is the most critical step. **Thoroughly dry** instruments before sterilization. Moisture trapped in joints or box locks is the primary cause of rust during autoclaving.

3. Inspection & Lubrication

- **Visual Check:** Inspect tips for sharpness, alignment, and any signs of "spotting" or corrosion.
- **Lubrication:** For all hinged instruments (Forceps, Needle Holders, Scissors) and spring-action tools (Crown Removers), apply a **medical-grade, water-soluble lubricant** (Instrument Milk).
 - o *Note:* Do not use industrial oils; they will interfere with the sterilization process.

4. Sterilization (Autoclaving)

- **Parameters:** Follow standard steam sterilization cycles (typically **134°C for 3–5 minutes**).
- **Loading:** Do not overload the autoclave. Ensure steam can circulate freely around every instrument surface.
- **Cassette System:** We recommend using **CONODENT Stainless Steel Cassettes** to protect delicate tips from rattling and breaking during the cycle

Quick Troubleshooting: Spots vs. Rust

Appearance	Cause	Solution
Brown/Orange Stains	High pH in water or dried blood.	Use distilled water and neutral detergents.
Dark Black Spots	Ammonia in cleaning agents or improper drying.	Ensure pH-neutral chemicals; dry immediately.
Bluish/Grey Tint	Excessive "Instrument Milk" or hard water.	Follow lubricant dilution ratios; use softened water.

he "CONODENT" Golden Rules

1. **Neutral pH Only:** Always use chemicals with a pH between 7.0 and 8.5.
2. **Open Joints:** Sterilize forceps and scissors in the **open/unlocked** position.
3. **No Tap Water:** Use distilled or deionized water for the final rinse & autoclave reservoir to prevent mineral scaling.

INDEX

Sr.No.	Title	Page No
1	Extraction Forceps	04 - 75
2	Root Elevators & Luxators	76 - 104
3	Diagnostics	105 - 129

CDT-C-930

Technical Datas:

Intercondylar distance	120 mm.
condylar inclination	fixed at 30°
Bennet angle	fixed at 7°
Incisal table inclination	10°
Distance between mounting plates	110 mm.
Weight	700 gr.
Opening	180°

features:

Lightweight anatomic articulator made of aluminum die-casting. it can be used following the geometrical laws of medium values (Bonwill triangle). Fixing according to centric. Automatic return to the hinge axis with springs. Perfect stability also in reversed position. Easy access and visibility to the lingual surfaces. interchangeable self centring aluminum mounting plates.

CDT-C-931

Technical Datas:

Intercondylar distance	120 mm.
condylar inclination	fixed at 30°
Bennet angle	fixed at 7°
Incisal table inclination	flat
Distance between mounting plates	110 mm.
Weight	700 gr.
Opening	180°

Special Features:

Adjustable back by registration screw to work without incisal rod by keeping constant trajectories and inclinations during side and back/forward movements. Pure translation movement (key and instructions included). Anti-shock hinge rod in case articulator falls down. Bigger size lock screws for mounting plates.

Increased height and width

- (1) More space when using removable stumps systems.
- (2) More space for installation of mobile prosthesis with high chewing or big base.
- (3) More space when using magnetic plates

CDT-C-932

Technical Datas:

Intercondylar distance	120 mm.
condylar inclination	fixed at 30°
Bennet angle	fixed at 7°
Incisal table inclination	10°
Distance between mounting plates	85 mm.
Weight	400 gr.
Opening (item 5000)	125°
Opening (item 5010)	180°

CDT-C-933

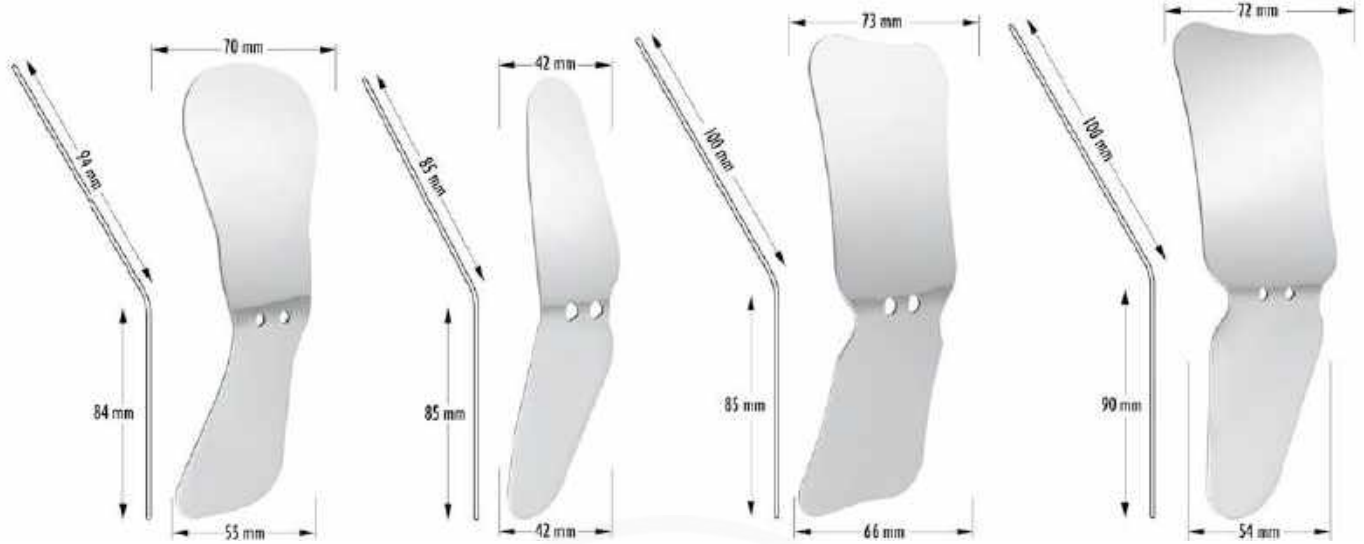

Technical Datas:

Intercondylar distance	110 mm.
condylar inclination	fixed at 30°
Bennet angle	fixed at 7°
Incisal table inclination	flat
Distance between mounting plates	85 mm.
Weight	450 gr.
Opening	180°
